

# Hamza Bin Maqsood

## Python Backend Developer

Backend-focused Software Engineering graduate building REST APIs, database-driven systems, authentication workflows, and AI-integrated applications using Python, Django, FastAPI, PostgreSQL, and modern development practices.

**CORE SKILLS**

**Backend**

Python

Django

FastAPI

REST APIs

JWT Auth

OOP

API Integration

**Databases**

PostgreSQL

MySQL

SQLite

SQL

DB Design

**Tools**

Git

GitHub

Postman

Swagger

Docker Basics

**AI**

LLM Integration

OpenAI APIs

NLP Basics

**EDUCATION**

**BS Software Engineering**

University of Azad Jammu & Kashmir

2021 – 2025

**CGPA: 3.78 / 4.00**

**PROFESSIONAL SUMMARY**

Motivated Python Backend Developer with practical experience in building REST APIs, authentication systems, database-driven modules, and AI-enabled software applications. Experienced in Django, FastAPI, PostgreSQL, MySQL, API integrations, debugging, and structured backend workflows. Strong academic foundation in Software Engineering with professional exposure through company projects, internships, and real-world backend tasks.

**EXPERIENCE**

**Backend Developer**

SyntecX Solutions

Nov 2025 – Present

- Develop and maintain backend modules for enterprise web applications and workflow systems.
- Work with APIs, database operations, authentication flows, debugging, and business logic implementation.
- Collaborate with senior developers to understand existing codebases and implement assigned backend tasks.
- Support production-style applications involving workforce management, reporting, and internal workflows.

Skills: Python, Django/FastAPI Concepts, REST APIs, MySQL, PostgreSQL, Git, Debugging

**Python Backend Developer Intern**

IDIOSOL

Sep 2025 – Nov 2025

- Worked on backend development tasks involving application workflows, data handling, and debugging.
- Applied modular programming, object-oriented concepts, and

## EXPERIENCE CONTINUED

### Web Development Intern

Jun 2025 – Aug 2025

#### AJK Information Technology Board

- Built and tested responsive web components and practiced frontend-to-backend integration workflows.
- Worked on web development tasks involving interfaces, forms, data display, and project collaboration.

**Skills:** HTML, CSS, JavaScript, Bootstrap, Web Development

### Full Stack Developer Intern

Jul 2024 – Oct 2024

#### Hi-Tech Solution

- Worked on web application features involving frontend pages, backend logic, CRUD operations, and databases.
- Practiced validation, form handling, database connectivity, debugging, and full-stack workflows.

**Skills:** Python/PHP, MySQL, HTML, CSS, JavaScript, CRUD

## SELECTED PROJECTS

### Tourista — AI Powered Smart Tourism Platform

Python • Django • PostgreSQL • REST APIs • AI Integration

Final Year Design Project focused on intelligent travel planning, AI-assisted recommendations, itinerary support, authentication, database-driven modules, and tourism service workflows.

- Designed backend modules for users, trips, recommendations, and platform workflows.
- Integrated AI-assisted features for smart tourism planning and user support.
- Implemented database structures, authentication concepts, and API-based communication.

### KissanKiPeychan / GAM Backend API

Django • DRF • PostgreSQL • Excel Import • API Development

Real company backend task involving Green Agri Mall data import, database model creation, and REST API exposure for location-based data.

- Created database model and import workflow for Excel-based records.
- Implemented GET API with structured JSON response, pagination, search, and filtering concepts.
- Worked with backend validation, admin panel records, and endpoint testing.

### AI Recommendation API

FastAPI • Python • PostgreSQL • REST APIs

Backend API project focused on recommendation workflows, structured request validation, and AI-assisted response handling through clean API architecture.

- Designed REST endpoints for recommendation-related workflows.
- Practiced request validation, JSON response structuring, and backend API architecture.
- Strengthened FastAPI routing and API testing skills.

## ADDITIONAL PROJECTS

### Multi-Vendor E-Commerce Backend System

Django/PHP • MySQL • RBAC • CRUD • Authentication

Role-based e-commerce backend with Super Admin, Store Admin, and Customer flows, including product management, cart workflows, database relations, and modular backend structure.

- Built authentication, role-based access, product management, and cart-related workflows.
- Designed relational database tables and business logic for e-commerce operations.
- Practiced repository/service/controller-style separation and maintainable code structure.

### Enterprise Workforce Management Modules

Backend Development • APIs • Databases • Workflow Systems

Worked on enterprise workflow-related backend concepts involving employee tracking, attendance, reporting, and operational data handling while maintaining confidentiality of company systems.

## ACADEMIC & TECHNICAL EXPOSURE

### AI / Machine Learning

- Machine Learning fundamentals using Python and Scikit-learn concepts.
- NLP basics for chatbot and text-processing workflows.
- AI API integration and prompt engineering basics.

### Backend Engineering

- REST API development with authentication and database integration.
- SQL queries, relational database design, and CRUD operations.
- Debugging, testing with Postman, and API documentation with Swagger.

## CERTIFICATIONS & INTERNSHIP EXPOSURE

- ISPR Summer Internship Program — exposure to structured IT environment, professional communication, and organizational workflows.
- AJK IT Board Internship — practical web development and software project exposure.
- Academic projects in Machine Learning, NLP, Digital Image Processing, and Cloud Computing fundamentals.

## CAREER FOCUS

Currently focused on growing as a Python Backend Developer with a long-term direction toward AI Backend Engineering, scalable software systems, cloud-ready backend development, and global software engineering opportunities.
